

PolyTherm GmbH & Co. Kunststoffveredelungs-KG

Corona Virus (COVID-19) - Information of PolyTherm GmbH & Co. Kunststoffveredelungs-KG : Emergency Plan and Supply Chain

Dear Customer, dear Business Partner,

in view of the special situation regarding the coronavirus (COVID-19), we have taken important precautions to protect the health of our employees, customers, suppliers and partners.

Emergency plan at PolyTherm GmbH & Co. Kunststoffveredelungs-KG:

We have now implemented an emergency plan in the whole company which will be carried out until further notice. This action plan concerns the maintenance of business activities on the one hand and on the other hand it allows some employees to do their work in home office mode and our production employees work in independent two shifts. In order to guarantee the security and reliability, all important functionalities will be continued right now.

Travel restriction:

In order to prevent the Corona virus from spreading further and to protect our employees and our business partners as a precaution, the emergency plan also provides for travel restrictions. Travel to so-called risk areas and visits by business partner (customers and suppliers) in our company are prohibited. In addition, the restrictions of local and state authorities must be strictly followed. When the border is closed by the authorities travel outside the country's borders is also prohibited.

Critical issue:

Supply chain disruption is moving east to west with the spread of the virus and the increase in numbers of cases in Italy, Spain, France, Germany, Switzerland and some Eastern European countries.

The company PolyTherm GmbH & Co. Kunststoffveredelungs-KG do everything to continue to guarantee you the best possible service and supply of our high quality materials. However, there may be a little longer waiting time to answer your inquiries and maybe there are some postponing of deliveries due to the actual critical supply chain situation.

Our decision to implement the emergency plan was made against the background of great responsibility towards the population and society. We are firmly convinced that in such an exceptional situation, protecting health from economic or other motives has priority.

We thank you for your understanding and appreciate the trust you place in us every day.

Yours sincerely

Martin Senger
-CEO-
